THE VALUE OF YOUR ELECTRICAL TECHNOLOGY DEGREE

MSU-Northern's Electrical Technology program is the only program in the state to offer an Associate of Applied Science in conjunction with the State of Montana Apprenticeship program.

Additionally, the electrical program offers apprentices the opportunity to learn in hands-on courses, and covers a major portion of the academic requirements of an apprenticeship. As a result, up to 3,115 hours can be applied toward the total 8,000 required apprenticeship hours, and graduates are prepared to start their career with a firm foundation of knowledge and skill. Opportunities for you include careers in engineering consulting, electrical distribution and sales, electrical estimating, electrical maintenance and construction, or as a self-employed electrician. Bureau of Labor Statistics show that employment of electricians will grow faster than the average of all occupations through the year 2020.

15 TO FINISH

WANT TO GRADUATE ON TIME? SAVE MONEY? GET BETTER GRADES?

15

You're going to need 15. That's the number of credits you need to take each semester to graduate on time. Sure, you can take less and still receive some scholarships and funding. But unless you take 15 credits a semester (or 30 a year), you're looking at an extra year or more in order to graduate. Know the courses you need to graduate, and meet with your advisor to map out a plan to earn your degree on time.
